Specification Sheet (Superceded) / 01
A353 (HLB65) polyether polyurethane foam

Description

A polyether polyurethane foam with a high density and hardness for use as a core material in abrasion pads.

Typical physical properties

Physical properties are measured using test methods based on the relevant BS EN ISO Standards

Colour

Standard colour is Grey, other colours may be available upon request

| Typical physical properties | |
|-----------------------------|--------------|
| Nominal piece density range | 65-80 kg/m3 |
| Nominal CLD Hardness (40%) | 25 kPa min. |
| Nominal tensile strength | 150 kPa min. |
| Nominal elongation at break | 90% min. |

The above figures are average values.
We recommend that you examine any material you select to ensure its suitability for your application.
Tolerance(s) applied in accordance with ASG specification No W1007 (<https://bit.ly/3nKm6Hj>) unless otherwise stated.
Our standard terms and conditions of trading (<https://bit.ly/3b3mThw>) apply at all times.
